

## Letter of Recommendation

Oct.9th, 2015

TO WHOM IT MAY CONCERN:

Dear Sir or Madam,

This letter serves as my formal recommendation for Spaceframe Construction & Engineering Co., Ltd as a qualified and reputable EPC contractor operating in China. Spaceframe were appointed as our General Contractor of Handtmann Light Metal Foundry (Tianjin) Co., Ltd. new plant project in Tianjin Airport Economy Area (TAEA) and successfully delivered the project on time and in budget.

During their time on Handtmann project, besides being a pleasure to work with, Spaceframe consistently demonstrated their technical and management strengths through their hard work and commitment to the success of the project. Their efforts produced high quality results in the face of a very aggressive time schedule. Particularly notable where the following:

1. Spaceframe started their site excavation work immediately on the day after receiving our letter of award in Nov. 29<sup>th</sup>, 2013.
2. They managed to complete all the underground foundations and ground beams work within 40 days of starting and before Chinese New Year, 2014 as they promised during the bidding phase.
3. The main building was prepared 2 months ahead of time at our request to achieve trial production target dated to Sept.1<sup>st</sup>, 2014 allowing Handtmann to test and commission our die-casting machine and meet our commitments to our client - Volkswagen.
4. Throughout our trial production period and during the defects liability period Spaceframe provided outstanding support to Handtmann and were always at hand to help to resolve problems after the project completion.
5. Since this is the first Handtmann Foundry investment outside Europe, Spaceframe also provided us a great support to deal with the government registration and final acceptance with various bureaus to ensure our project was formally registered on time.

Spaceframe has a tremendous ability and resource to provide a more international level of design detailing over and above the normal the drawings provided by the local design institute particularly in architecture, steel structure, mechanical, electricity and decoration, which is a plus for any project.

In closing, as detailed above, Spaceframe was an excellent and reliable partner to Handtmann and I believe they can add value when working with overseas clients.

Spaceframe is definitely one of the best EPC contractors I have ever worked with thus I highly recommend Spaceframe as a candidate for the role of EPC or General Contractor for your project and if you need any clarification on this recommendation.

Sincerely yours,

  
Dr. Michael Ilagemann

Board of Director to Handtmann Light Metal Foundry (Tianjin) Co., Ltd.
